Elena Uvarova

has successfully completed the online, non-credit Specialization

Generative AI for UI UX Design

The certificate holder can use generative AI in UX/UI workflows to accelerate ideation, automate prototyping, personalize user experiences, and improve usability testing. They have a strong grasp of AI fundamentals, real-world application across multiple domains, and the role of prompt engineering in creating high-quality, design-focused outputs. They can design innovative solutions, build dynamic prototypes, apply AI-driven personalization, and refine usability with testing insights using generative AI. Through hands-on labs and projects, they've demonstrated job-ready skills in integrating AI into design processes, streamlining workflows, generating creative variations, and staying ahead in the evolving UX/UI field.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
